® BALETITE

Baletite 3000m has been developed for the demand of modern contracting, maximising the number of bales per roll. With a 3000m film length, contractors can carry more film on the baler, without returning to the yard for restocking. This saves valuable time.

Extra film length > **50% more bales****

Recycle ready† > **recycle with bale wrap**

Additional oxygen barrier > **fewer silage losses**

Smooth film surface > **easier feed out**

Technical Specifications - Baletite

Application	Width (mm)	Thickness (µm)	Length (m)	Reel weight (Kg)	Reels Per Pallet (#)
Grass	1330	15	3000	58	16

Baletite is manufactured in ISO 9001, ISO 14001, ISO 45001 and ISO 50001 accredited manufacturing facilities.

In the unlikely event of a problem each reel of Baletite is individually labelled to ensure 100% traceability.

*Compared to netwrap. **Compared to Baletite 2000m.

†Depending on number of reels used. ‡Where PE film collections exist.
