

# ® BALETITE

## Compact Your Maize

**Stronger  
Film**

**More Bales  
Per Reel\***

\*when using high pressure settings on the machinery

**High Holding  
Force**

**Convenient  
Sleeve  
Packaging**

**Easy  
Opening**

**Recycle  
With  
Bale Wrap**

### Baletite for maize

| Application      | Width (mm) | Thickness (µm) | Length (m) | Reels Per Pallet (#) | Pallet Dimensions (cm) | Pallet Height (m) |
|------------------|------------|----------------|------------|----------------------|------------------------|-------------------|
| Maize/Sugar Beet | 950        | 13             | 2400       | 20                   | 112 x 130              | + 1.10            |
|                  | 1280       |                |            |                      |                        |                   |

# ® **BALETITE**

Baletite Compact is specifically made for compactor machinery. As the film is stronger, the use of less layers of film is needed with the high break tension setting on the machinery.

## Using 5 layers with high break tension:

- Bales are more compact with less expansion
- Less oxygen in the bale
- Bale mobility without breakage
- Better protection

## Using less layers with high break tension:

- More efficiency > more bales per hour
- More bales/reel > less cost/bale and less reel changes

# ® **BALETITE**

Baletite is manufactured in ISO 9001, ISO 14001, ISO 45001 and ISO 50001 accredited manufacturing facilities.

In the unlikely event of a problem each reel of Baletite is individually labelled to ensure 100% traceability
